

# INVENTORY MANAGEMENT

CONTROL THROUGH BETTER SYSTEM MANAGEMENT

## MANAGE YOUR STOCK SIMPLY AND COMPREHENSIVELY USING INVENTORY MANAGEMENT

Inventory enables the control of your raw materials, finished goods and sub-assemblies, and is integrated with Job Costing, Purchasing, and Bill of Materials.

This module allows for the detailed reporting of item numbers, serial numbers, supplier numbers, with multiple locations and nominated bins, and accurate stock valuations

### INVENTORY LIBRARY

This is where all of your part numbers are stored and tracked, with information being recorded such as descriptions of goods, location and bin stock levels for the selected part number, current on hand levels and much more.

Inventory also tracks the average, last and standard costs for all items automatically, due to the complete integration with the requisitioning and purchasing modules.

Also track multiple prices for raw materials from multiple suppliers to provide the flexibility when you need it most.

### STOCKTAKE

Simple to use and fully integrated with the financial modules, BusinessCraft takes the pain out of doing stocktakes. With distributions automatically created for authorised stocktakes, and adjustments being posted also, all conducted with a full audit trail.

### REPORTING

Provided with over 30 built-in comprehensive reports, including:

- Stock price lists – by product, supplier, price and availability, comparisons
- Stock valuation reports – by supplier, product category, product group
- Stock reports – usage, reordering, exceptions
- Stock analysis – ABC analysis, best sellers, slow movers, sales by category

### BILL OF MATERIALS

Bill of Materials is tightly integrated to Inventory Control for simple usage. Graphical display of all assemblies and up to 8 levels of sub-assemblies can be used with simple creation of new assemblies “on the fly”.

Job Cards are generated for multiple level assemblies associated with larger jobs. And all assembly components are tagged as manufactured or purchased via requisitions.
