

JOB COSTING & BUDGETS

PROVIDING TRANSPARENCY WHEN IT COUNTS

UNLOCK YOUR BUSINESS' POTENTIAL WITH BUSINESSCRAFT JOB COSTING & BUDGETING

Job Costing is the vital hub of BusinessCraft in the engineering environment. The system readily captures "real time" information from all areas of BusinessCraft for maximising your company efficiency and productivity.

JOB RECORDS

Each job allows for the recording of your project information and is linked to accounts via the debtor on each job. Parent/Child structures are used to more easily manage and review larger projects at various levels.

Job can be analysed by job type, customer, job manager, market segment, status codes and many more.

TRACK COSTS

Collect costs in five different categories; Labour, Subcontractor, Purchases, Materials & Other costs. Utilise the cost explosion report to drill-down on every cost on the job, coupled with budget reports showing variances of the actual costs against the budget.

DOCUMENT REGISTER

Totally user-definable document types to suit your business needs.

You can record all telephone calls, emails, letters, faxes, drawings, photos and more in one location associated with a job, account or specific person, and stores all document files in a central location on file server, ensuring that backups occur.

JOB SCHEDULING

Job Scheduling and tracking is available by multiple methods of date controls over a nominated period. These can be based on the ordered date, required date, scheduled date or release date.

JOB BUDGETS

Allocate simple or complex budgets for tracking the margin on your job and to assist with calculating total expected costs. Budgets can be stored by section, department and cost centre for improved variance reporting.

WORK PACKAGE CONTROL

These are company standard Documents that are common for job procedures and do not need to be modified for a specific job. For example, testing procedures, site inductions, etc.

A record is kept of those that have been selected and printed for the job and remains as part of that job.
